## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,594,322 A to Rozman et al. (prior art document submitted by applicant).

Rozman et al. clearly teaches the construction of a starter/generator system with variable-frequency exciter control comprising:

a synchronous and brushless starter/generator (10) including an exciter generator (14) with a DC winding;

a start converter (36) for starting an engine in combination with said starter/generator; and

a controller (84), for providing AC power to said exciter generator during a start mode of operation and DC power to said exciter generator during a generate mode of operation, comprising:

a logic circuit (Figure 7B) for receiving input signals and generating output signals based on said input signals, which include:

signals relating to a regulated voltage level being applied to a particular line portion of said starter/generator system,

Application/Control Number: 10/649,548

signals relating to the current level being applied to a predetermined portion of an AC bus, and

signals selectively enabling the start mode or generate mode of operation;

a switching circuit (72) for providing AC power to an exciter stator of a starter/generator system during a start mode of operation and DC power to said exciter stator during a generate mode of operation based on said output signals, and includes a full bridge arrangement (Figure 7A) of electronic switches including at least four switches for providing said AC and DC power to said exciter stator;

wherein said controller provides:

the AC power during said start mode with a predetermined magnitude and frequency lo energize an exciter stator in said starter/generator, and

the DC power during said generate mode with a predetermined voltage level to produce a regulated voltage level output from said starter/generator, which is applied at a predetermined portion of an AC bus.

3. With regards to claim 4, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art.

Application/Control Number: 10/649,548 Page 4

Art Unit: 2834

See In re Casey, 370 F.2d 576, 152 USPQ 235 (CCPA 1967) and In re Otto, 312 F.2d 937, 939, 136 USPQ 458, 459 (CCPA 1963).

## Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pedro J. Cuevas whose telephone number is (571) 272-2021. The examiner can normally be reached on M-F from 8:30 - 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Darren Schuberg can be reached on (571) 272-2044. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
